

RPA Pupil Guide

How to access the school system from home

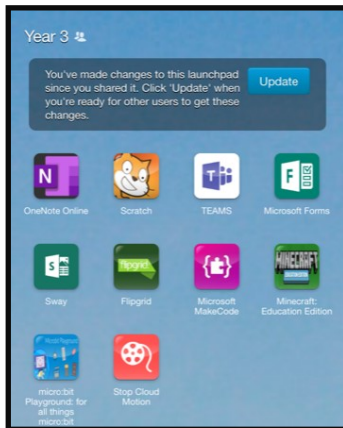

Open your browser, and search for :

Get.Airhead.io

This should bring you to this website.

You will need to type in your school email and password.

This will then take you to your home screen, where you can access your launchpad any school apps (such as Spelling Shed, TT Rockstars, Scratch) as well as any launchpads that your teacher has shared

The children know their school login details. They are the same as their laptop logins they use at school every day. They should also have a copy of their usernames and passwords in their reading/home logs.
